

# TS-1905 TIP SWITCH

The AMR Tilt Switch is a simple yet versatile unit to sense material levels both underground and in surface operations. The TS-1905 is potted to increase its durability. It is designed to be hung vertically, using the attached eyehook. If it tilts more than 30 degrees in any direction, the normally closed mercury switch opens the units internal relay, providing normally open contacts. The switch is rated for 120 VAC at 7 Amps

## SPECIFICATIONS
